

On September 21, 2014, the **area of Antarctic sea ice** pulverized its last record of 2013:

20.14 million km² = Record of 2013 + Area of France

The **Arctic** regained very quickly the **Volume of Ice** lost during the summer of 2012

The **total area of sea ice** has again become **surplus** since 2013.
